PH - DRIVING STUD

PH-58

Description

Purpose: Used for driving sectional copperbonded ground rods (IHP).

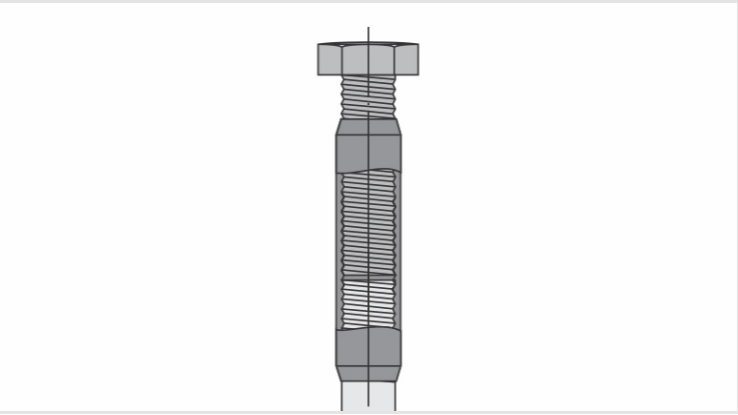

Characteristics: High impact and shock resistance.

Application: Grounding of sectional copperbonded ground rod. The driving stud is attached to the coupling to prevent damage to the threads of the stud during ground rod driving.

Material: High mechanical resistance steel.

Finish: Black oxidation.

Datasheet

Threaded Couplings LEH	LEH-58-R
Thread / Length of Screw	5/8" UNC x 2"
Package	
Qty. / Package	50
Unit Weight (g)	98,00
