

ACB / ACH / ACB-E - STIRRUPS FOR CONNECTORS

ACB-38-E

Description

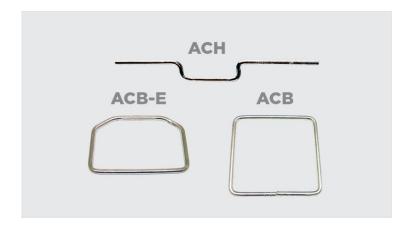

Purpose: Conection between CA, CAA aluminum or copper cables with wiedge, compression and hotline clamp connector.

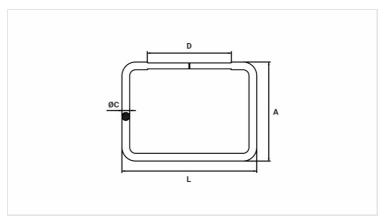

Characteristics: Connection can be by tightening, compression or spring system. High electrical conductivity and corrosion resistance. Stirrups designed for perfect adaptation with connectors / clamps such as CAH, CAC, CDC, CADC, GLV, among others.

Application: Power distribution lines.

Material: Electrolytic copper.

Finish: Tin plated
