

GLV - HOTLINE CLAMPS

GLV-150-BZ (PADRÃO CEMIG)

Description

Purpose: For interconnecting medium voltage network in copper, aluminum AC or AAC cables (with or without stirrup) to the connection of a fuse, transformer or knife switch.

Characteristics: High electrical conductivity and tightening connection.

Application: Power distribution networks (low and medium voltage).

Material: Bronze, brass or aluminum alloy.

Application Tool: Hot stick.
